

Why Choose Azure Cloud over On-premise Infrastructure

Why Choose Azure Cloud over On-premise Infrastructure

Why Azure over On-premises?

- Lessen costs to infrastructure.
- No hardware to maintain or refresh – ever.
- Windows server license and Client access licenses included.
- Built-in / free disaster recovery.
- Monthly subscription basis and PAYG option.
- Easily switch to new lower-cost/higher-power compute series.
- Easily increase or decrease the power of as per business needs.
- Endless storage with ultra-low cost storage tiers.
- No power failures or downtime.
- Virtual server hosting allows you to connect from anywhere.

- Better SLA for a virtual machine.
- Easy integration with Microsoft tools.

How does Azure Pricing Work?

Microsoft Azure services offer pay-as-you-go the pricing (PAYG) model. This is basically, you'll only get charged based on your utilization of cloud space. The pricing can also differ if a specific application utilizes a range of Azure services where charges will be levied. However, long-term customers get some of the Azure services at a discounted price.
